AXM-400 適合什麼情況

概念展示資料 Concept Demonstration Data

AXM-400 是鋒岳自動化模組化產品線中的精密線性運動模組，設計目標是為需要穩定重複定位精度的加工、檢測與組裝站點提供結構化的運動基礎。此為概念產品，以下定位說明用於展示產品頁應如何清楚陳述「適合情境」而非單純條列規格。

What AXM-400 Is For

Built for stations needing stable, repeatable positioning accuracy in machining, inspection, or assembly — configurable with servo motors so stroke and speed can be tuned to the actual process, rather than sold as a one-size-fits-all module.

適用情境 Use Cases

- 精密加工站的工件定位 — Workpiece positioning in precision machining stations
- 檢測站的取放與對位 — Pick-and-place and alignment in inspection stations
- 組裝站的重複性直線運動 — Repetitive linear motion in assembly stations
- 既有產線瓶頸站點的局部自動化升級 — Localized automation upgrades at existing line bottlenecks

何時不適合 When It Might Not Fit

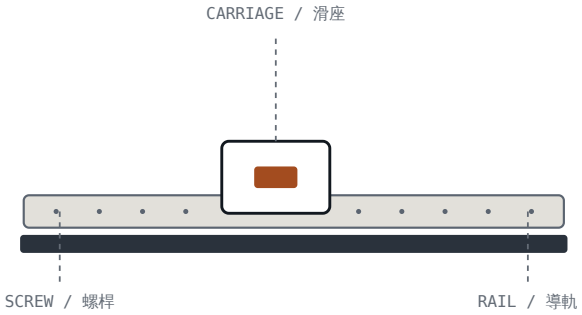

需要非線性（旋轉、多軸協調）運動路徑的應用、需要超出標準行程配置範圍的超長行程需求，或現場環境要求防爆／特殊介質相容認證但尚未經工程確認者，應先與技術團隊討論可行性，而非直接採用標準配置。

特性與結構示意 Features & Structural Diagram

特性 Features

- 高剛性結構設計，降低高速運行時的振動 — High-rigidity structure reduces vibration during high-speed operation
- 適合精密定位應用，重複定位精度可依配置調整 — Repeatable accuracy configurable per setup
- 可搭配多種伺服馬達與驅動器 — Compatible with a range of servo motors and drivers
- 模組化安裝介面，便於整合至既有機構 — Modular mounting interface simplifies integration
- 支援多種行程長度配置 — Available in multiple stroke length configurations

結構示意 Structural Diagram

示意圖僅表示結構關係，非精確工程圖 — Diagram indicates structural relationships only, not to engineering scale.

TECHNICAL SPECIFICATIONS · 技術規格

技術規格表 Technical Specifications

項目 / ITEM	規格 / VALUE
結構型式 / Structure Type	滾珠螺桿式線性模組 / Ball-screw linear module
行程長度 / Stroke Length	100mm–1000mm（依配置，Demo 數值）/ per configuration, demo value
最大負載 / Max Payload	依配置評估（Demo 數值）/ evaluated per configuration, demo value
重複定位精度 / Repeatability	依配置與工程確認（Demo 數值）/ per configuration, engineering-confirmed, demo value
驅動方式 / Drive Type	伺服馬達（可選配）/ Servo motor (optional)
安裝介面 / Mounting Interface	標準化模組介面 / Standardized modular interface

本頁技術規格為概念展示資料，實際產品需依工程條件確認。Specifications shown are fictional demonstration data; actual configurations require engineering review. Figures on this page are identical to and internally consistent with src/content/products/axm-400.md, the site's canonical spec source.

選配項目 Optional Configurations

- 伺服馬達與驅動器套件 — Servo motor and driver kit
- 防塵防護等級升級 — Upgraded dust protection rating
- 客製安裝支架 — Custom mounting brackets
- 線性尺回饋模組 — Linear encoder feedback module

BEFORE YOU REQUEST A QUOTE · 詢價前準備

詢價前需準備的資料 What to Prepare Before Requesting a Quote

為了讓技術團隊能在第一輪溝通就給出有意義的評估，建議在提交 RFQ 前先準備以下資訊：

- [ ] **工件圖面／CAD 檔案** — Workpiece drawings or CAD files, including critical tolerances.
- [ ] **製程節拍需求** — Target cycle time / takt time for the station.
- [ ] **既有設備介面條件** — Interface constraints of existing equipment the module will integrate with.
- [ ] **現場空間與安裝限制** — On-site space and mounting constraints.
- [ ] **環境條件** — Environmental conditions (dust, temperature, cleanroom class if applicable).
- [ ] **是否已有初步技術規格或保密協議需求** — Whether you already have draft specifications, and whether an NDA is required before sharing them.

可透過網站 `/zh-tw/contact/` 或 `/en/contact/` 的 RFQ 表單提交上述資訊；本網站為作品集概念案例，表單目前運作於 Demo Mode，資料不會實際送出。

Concept / Fictional Data Disclaimer 概念／虛構資料聲明

中文

本文件是頁構所（Yegou Studio）為市場驗證作品集所建立的概念展示資料，「鋒岳自動化 FORGEON AUTOMATION」與「AXM-400」均為虛構品牌與虛構產品，並非真實販售中的商品。文件中所有技術規格數值（行程長度、最大負載、重複定位精度等）皆為示範用途編造的概念數字，僅用來展示一份完整技術資料表應具備的資訊架構與排版方式，不代表任何實際產品的真實效能或已驗證的工程數據。

本文件**不包含任何真實或暗示性的第三方認證、專利、獎項或合格標章**（例如 CE、ISO、UL 等），也未使用任何真實客戶案例、真實產線照片或真實測試報告。若日後有真實產品需要製作正式技術資料表，應由實際工程與品保團隊依真實測試數據重新撰寫，本文件不得作為真實技術文件使用或引用。

English

This document is fictional demonstration content created by Yegou Studio (頁構所) for a market-validation portfolio piece. "FORGEON AUTOMATION" and "AXM-400" are a fictional brand and a fictional product, not a real item for sale. Every technical figure in this document (stroke length, max payload, repeatability, etc.) is invented for demonstration purposes only, intended to show the information architecture and layout a real datasheet should have — none of it represents actual, verified engineering performance of a real product.

This document contains **no real or implied third-party certification, patent, award, or compliance mark** (e.g. CE, ISO, UL), and uses no real customer cases, real production-line photography, or real test reports. Should a real product ever require an official datasheet, it must be authored by an actual engineering and quality-assurance team using real, verified test data — this document must not be used or cited as real technical documentation.
